

Diabetes Supplies: What Your Plan Covers

Starting July 1, 2026

Diabetes supplies help you manage your condition. They give you up-to-date information about your blood sugar. This helps you and your doctor make the best decisions for your care.¹

About this list.

This is a list of the diabetes supplies most often prescribed.

- Products are in alphabetical (A-Z) order.
- Generics are in lowercase letters. Brands are in ALL CAPITAL letters.
- This list doesn't include the diabetes supplies that are covered at no cost (\$0) under the Patient Protection and Affordable Care Act (PPACA), also known as "health care reform."
- **This list changes often**, so it may not show every diabetes supply your plan covers. Your plan may not cover all the supplies listed here. To see what your plan covers, log in to the myCigna[®] app² or **myCigna.com[®]**.

Your cost for diabetes supplies.

Diabetes supplies are covered as preventive under your plan. This means you'll pay your preventive cost-share to fill them.

- Not all plans cover preventive products the same way. Some plans may have you pay part of the cost (like a copay, coinsurance, or deductible), while others don't.

Log in to the myCigna app or **myCigna.com**, or check your plan details, to see what diabetes supplies your plan covers and what you'll pay.³

- Most brand-name diabetes supplies that have a generic version aren't covered at your plan's preventive cost-share.

Use a generic diabetes supply and save.

Generics work the same and provide the same health benefits as brand-name products – and they cost less.⁴

Diabetes Supplies: What Your Plan Covers

Your plan may not cover all of these products. Log in to the myCigna app or **myCigna.com**, or check your plan details, to see what's covered and what it will cost.

Cigna Healthcare reserves the right to make changes to this drug list without notice. Your plan may cover additional medications; please refer to your enrollment materials for details. Cigna Healthcare does not take responsibility for any medication decisions made by the doctor or pharmacist. Cigna Healthcare may receive payments from manufacturers of certain preferred brand medications, and in limited instances, certain non-preferred brand medications, that may or may not be shared with your plan depending on its arrangement with Cigna Healthcare. Depending upon plan design, market conditions, the extent to which manufacturer payments are shared with your plan and other factors as of the date of service, the preferred brand medication may or may not represent the lowest-cost brand medication within its class for you and/or your plan.

Health benefit plans vary, but in general to be eligible for coverage a drug must be approved by the Food and Drug Administration (FDA), prescribed by a health care professional, purchased from a licensed pharmacy and medically necessary. If your plan provides coverage for certain prescription drugs with no cost-share, you may be required to use an in-network pharmacy to fill the prescription. If you use a pharmacy that does not participate in your plan's network, your prescription may not be covered, or reimbursement may be limited by your plan's copayment, coinsurance or deductible requirements. Certain features described in this document may not be applicable to your specific health plan, and plan features may vary by location and plan type. Refer to your plan documents for costs and complete details of your plan's prescription drug coverage.

Cigna Healthcare products and services are provided exclusively by or through operating subsidiaries of The Cigna Group.
