

PPACA \$0 Preventive Medications

Prescription medications and over-the-counter products available at no cost-share

The Patient Protection and Affordable Care Act (PPACA), known as "health care reform," requires health plans to cover the full cost of some preventive medications and over-the-counter (OTC) products. This means you don't have to pay anything – no copay, no coinsurance, no deductible.

About this drug list.

This is a list of the preventive medications you can get at no cost-share (\$0).¹

- Medications are in alphabetical (A-Z) order by drug class/condition.
- Generics are in lowercase letters. Brands are in ALL CAPITAL letters.
- **This drug list changes often**, so it may not show every preventive medication you can get at \$0. To see all of your no cost options, log in to the myCigna® app² or **myCigna.com**® and use the Price a Medication tool.
- If your doctor doesn't think a contraceptive or quit smoking product on this list is right for you, ask your doctor's office to contact us. We'll look for other options that may be available at \$0.

A note about contraceptive products:

Contraceptives, or "birth control," are used to prevent pregnancy. Not all plans cover them at \$0. Some employers don't cover contraceptives because of their religious beliefs.

If you have Cigna Healthcare® pharmacy benefits and your employer doesn't cover contraceptives, you may still be able to get them at no cost. Ask your doctor's office to contact us. We'll keep your coverage private.

To get these medications at \$0, you'll need a prescription – even for the OTC products, which don't usually need one.³

PPACA \$0 Preventive Medications

To get these medications at \$0, you'll need a prescription – even for the OTC products, which don't usually need one.³

Aspirin Products

Available to women who are at least 12 weeks pregnant and at high risk for pre-eclampsia.*

This list is updated as the U.S. Preventive Services Task Force makes new recommendations to PPACA's preventive services coverage requirement.

1. This is a list of the prescription preventive medications and over-the-counter products covered at 100% under your plan's pharmacy benefit at this time, based on existing legal requirements, and is subject to plan terms such as limitations and exclusions. For example, this list may change if there's a change to the legal requirements for preventive coverage.
2. App/online store terms and mobile phone carrier/data charges apply. Customers under age 13 (and/or their parent/guardian) will not be able to register at myCigna.com.
3. If you're filling an OTC product, you'll need to pay for it at the pharmacy counter using your health plan coverage — just like you would for a prescription.
4. Male condoms kept behind the pharmacy counter are covered at no cost-share (\$0) when you have a prescription from your doctor and fill it at an in-network pharmacy. **Quantity limits may apply.**
5. **PPACA coverage requirements don't apply to all plans.** Log in to the myCigna app or myCigna.com, or check your plan details, to see how your plan covers these products and what they'll cost.
6. If your doctor feels these products aren't right for you, ask their office to contact us. There may be other \$0 options available.
7. Other generic hormonal contraceptives are available at no cost-share (\$0) to you, even if they aren't listed here.
8. OPILL is covered at no cost-share (\$0) when you have a prescription from your doctor and fill it at an in-network pharmacy. **Quantity limits may apply.**
9. These medications are only covered at no cost-share (\$0) when you use them on their own. They aren't covered at \$0 if you take them with other HIV medications.
10. As of January 1, 2025, DESCOVY is covered at no cost-share (\$0) when you use it on its own. It isn't covered at \$0 if you take it with other HIV medications.
11. **Quantity limits apply.** Generic nicotine replacement therapies (also called "store brands") are also available at no cost-share (\$0), even if they aren't listed here.
12. **Not all plans cover vaccines the same way, and most travel vaccines aren't covered.** Log in to the myCigna app or myCigna.com, or check your plan materials, to see how your plan covers vaccines. Before you go for your vaccine, call your pharmacy to make sure it's covered and available at their location. You usually don't need an appointment. If you use an out-of-network pharmacy, your vaccine may not be covered or may be subject to your plan's copay, coinsurance, or deductible.

Para obtener ayuda en español llame al número en su tarjeta de Cigna Healthcare.

Cigna Healthcare reserves the right to make changes to this drug list without notice. Your plan may cover additional medications; please refer to your enrollment materials for details. Cigna Healthcare does not take responsibility for any medication decisions made by the doctor or pharmacist. Cigna Healthcare may receive payments from manufacturers of certain preferred brand medications, and in limited instances, certain non-preferred brand medications, that may or may not be shared with your plan depending on its arrangement with Cigna Healthcare. Depending upon plan design, market conditions, the extent to which manufacturer payments are shared with your plan and other factors as of the date of service, the preferred brand medication may or may not represent the lowest-cost brand medication within its class for you and/or your plan.

Health benefit plans vary, but in general to be eligible for coverage a drug must be approved by the Food and Drug Administration (FDA), prescribed by a health care professional, purchased from a licensed pharmacy and medically necessary. If your plan provides coverage for certain prescription drugs with no cost-share, you may be required to use an in-network pharmacy to fill the prescription. If you use a pharmacy that does not participate in your plan's network, your prescription may not be covered, or reimbursement may be limited by your plan's copayment, coinsurance or deductible requirements. Certain features described in this document may not be applicable to your specific health plan, and plan features may vary by location and plan type. Refer to your plan documents for costs and complete details of your plan's prescription drug coverage.

Cigna Healthcare products and services are provided exclusively by or through operating subsidiaries of The Cigna Group.
